FITTING INSTRUCTIONS

L05090

WARNING

To avoid the risk of electrocution,

please turn off the electricity supply mains

before commencing the installation.

Infrared Sensor Operation Instruction

On/Off

Hand sweep at the mirror sensor in short time to on/off.

Dimming

When the light is on, put your hand to cover the sensor for more than 1 second, and the brightness will be dimmed from 5%-100%. Remove your hand to maintain the current brightness.

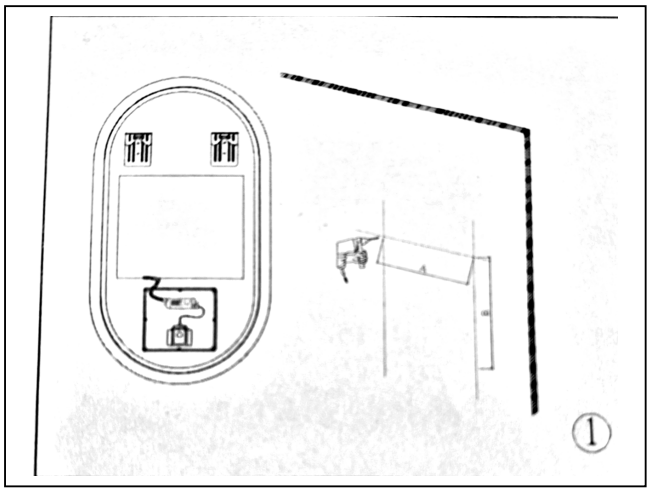
Color temperature

When the light is off, put your hand to cover the sensor for more than 1 second, and the light is turned on to switch the color temperature of the light.

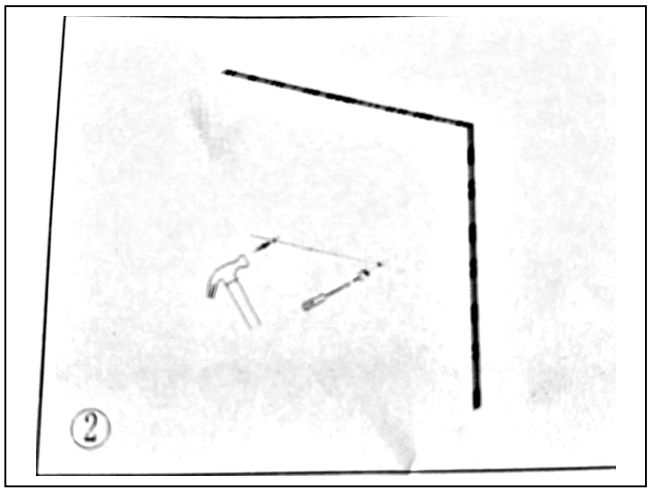
Do not stand the mirror upright on hard surfaces whilst fitting, as this will damage the edge.

Keep the plastic corner protectors on until installation is fully completed.

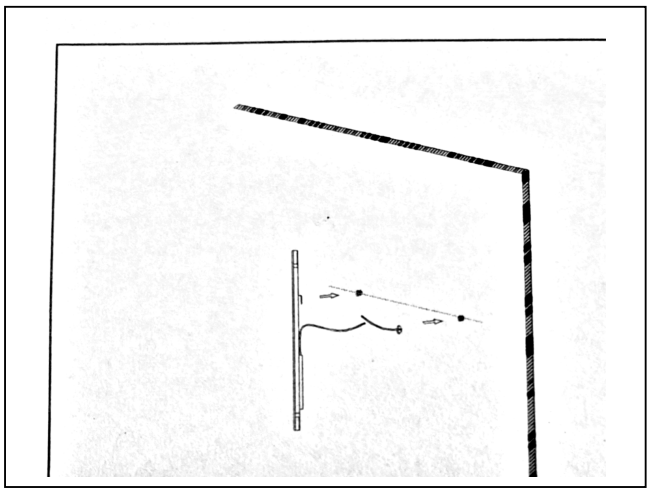
FITTING INSTRUCTIONS



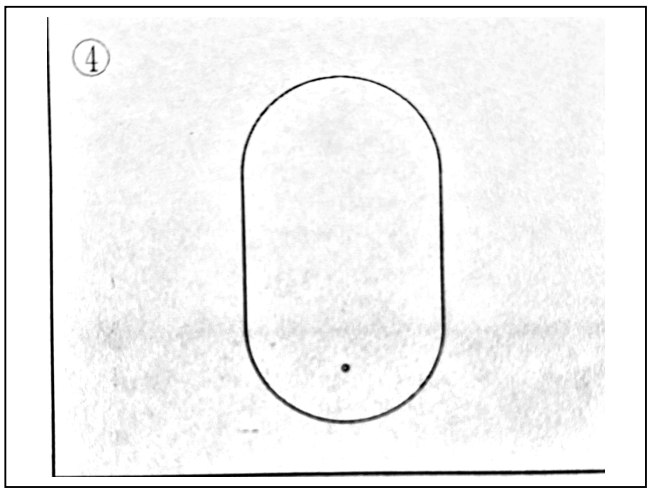
Measure the distance of the mounting hole. Drill holes with a suitable sized drill.



Insert the wall plug and mounting screw into the wall.



Connect the mirror wires with your main wires, and hang the mounting hole to the screw on the wall.



Peel off protective film and clean the mirror with damp cloth.

After care

Never use bleach based or window cleaning solution as these may damage the backing of the mirror. We recommend a damp cloth to remove splashes.
